Nice! Maybe you want to share the file with me so I can download it too? Click here to send it to me. Thank you! If you've found yourself staring at some sweet Grand Canyon photos or wondering what exactly the people in this batch are doing, then we've got good news and bad news for you. The bad news is that this isn't the Grand Canyon. The good news is that there's no Hollywood special effects involved. RELATED: 10 Amazing Photos Of The Grand Canyon This is the setting for the much anticipated sequel to AMC's Breaking Bad, which premiered last night, taking the viewer back in time to see what happened to Walter White (Bryan Cranston) after he left his workplace for the last time. The photos in question come from the set of Ozark, the next series from the much-acclaimed creator of True Detective and Mad Men, which will premiere later this year. As you can see, the photos show a different side of the Colorado River, highlighting the landscape in contrast to the area where Walter was actually filming. The images were taken by Los Angeles-based photographer Jason Bailey and were posted on his Tumblr page. He explains how he was given access to the location, which is currently under construction, and that his job was to "watch" over things for the crew. RELATED: Has Breaking Bad's Bryan Cranston Broken the Internet With His Role in Ozark? "They called me to the set and I was simply asked to photograph as I pleased," Bailey told ABC News. "As I found out later, the writers and directors love the Grand Canyon photos for this aspect of the show, but the extra mile I took was to photograph as if it was set in the Grand Canyon." This isn't the first time Bailey has worked with television and film crews, with past projects including 5 Below: The Hollow, which starred Olivia Wilde, and The Big Wedding, which starred Anna Faris. WATCH: Bryan Cranston on the Importance of Breaking Bad's Final Season We just hope they used less CG and more real footage, and made sure to include some of the famous landmarks of the Grand Canyon in the background. We'll have to wait and see what the next season of Ozark brings, but hey, who knows, maybe we'll get another glimpse 2d92ce491b
