Virtual dj 4.3 R12 Serial Number 2021.03.21 01:13.Q: Facebook Graph API Access Token I want to use Facebook's API in my app, but I can't get the app access token for my app. I've already tried the following: I got the App access token using my personal Facebook account and the app I want. I added the App access token to the FB.init function with no luck. I logged out of my personal Facebook account, logged back in and tried to get the app access token using the Graph Explorer. I was able to get the access token by using the app I used when logging in (see picture below). Is there any way to get the app access token? I need this for the user to login and I can't use the OAuth Dialog. A: I would recommend you to try the NodeJS Facebook API helper from Facebook. I'm using this helper to post on the users wall. Install via NPM: `npm install facebook` Initialize: `const FB = require('facebook');` Start the session: `FB.getSession(function(response){ // Do your stuff here: console.log('facebook-session:', response); });` Posts something on a user's wall: `FB.get('me/feed', params, function(response){`
