the biggest country, in the European Union (EU), to have this decision. Sweden decided to join the other 27 member states of
the EU in the phase of the Kyoto Protocol. This is also a step that has been influenced by the inhabitants, Swedes, who wanted
to get rid of this agreement. This decision is a good news for the population of the whole of Europe and it should be a
motivation for the states that are planning to join the Kyoto agreement (Poland, Latvia or Czech Republic, who want also to get
rid of the agreement). This declaration is a reaction of the states of the EU to the creation of a new agreement in the context of
climate change. This new agreement makes no reference to the emission of gases that are responsible for the atmospheric
pollution but it sets a limit for the emission of other gases. It will be the first time that a European country will have agreed to
this kind of agreement. "The European Union will reduce its greenhouse gas emissions to 1990 levels in 2020 and to be
consistent with the principles adopted by the UN General Assembly by 2050" [1]. It is important to know that the Kyoto
agreement was very technical and detailed. There were a lot of studies about the climate because it was an agreement for a long
period and there was a lack of continuity in the emission of the gases. The agreement was also made at a time when the political
science was very much dominated by the United States. The strictness of the Kyoto agreement made this agreement a
