Check out these steps to get the VitaScene effect in your video, using proDAD Vitascene 1.0 for Pinnacle Studio 15: Instructions: 1. Open Pinnacle Studio 15. Go to Edit- Page: Effects- Add/Edit: 2. Download the proDAD product called VitaScene for Pinnacle Studio, 15 (by clicking here) 3. Install the proDAD Vitascene V3 or proDAD Vitascene V4 in your Pro Tools session. 4. Open EDIUS and connect Pinnacle Studio 15 to Pro Tools. 5. Click in the tab called: Post Production- Add/Edit: 6. Search for VitaScene and add the effect. 7. Save and Ok. 8. Click on the VitaScene option in the preview window. Now the VitaScene effect can be used in your videos. The effect has been seen as an effect on the end of the project only when using the slow motion option or when the Kinoform is applied. You must use the fast playback mode when you will create or edit a titleclip. As a tip: when you use the VitaScene effect as a titleclip, the effect is only seen in full screen mode, when you use the normal view. In the preview window you can see that the effect works correctly only on one device. The preview window offers a separate tab on the devices where the effect is installed. After clicking on the VitaScene, the effect is only seen on full screen. If you want to see the effect on the normal screen, you have to disconnect the VitaScene plug-in. You can set the color of the text to red, black and white in the VitaScene product. The speed of the effect is adjustable. The

Fader and EQ can be used in the VitaScene effect. The currently installed Pro Tools plug-ins can not be selected for the VitaScene product. The exported video in EDIUS does not contain any personal information. Download and Enjoy ProDAD VitaScene 1.0 for Pinnacle Studio 15! If you like this effect, please give us some feedback. But also post your results, when you have used the VitaScene effect on your video. Share your footage with us: You can always buy the ProDAD products at our on-
