---

auto fx autoeye 2.11 (photoshop plugin)[serial] Auto FX Auto Eye is a plugin for creating realistic images using filters. Allows you to combine different effects such as shadows, reflections and highlights. For each filter, you can specify the direction of lightening and/or darkening the image. The kit comes with several filters that allow you to achieve realistic images. The plugin allows you to create realistic images using various filters, such as reflection, refraction, highlights and shadows.
