Advanced System Protector

Advanced System Protector is an easy-to-use anti-spyware program that allows you to perform a quick scan or a full-system scan in several modes, including custom. The program has a large list of settings and a versatile interface, allowing you to manage these details quickly and easily. Its interface is modern and simple, and it includes some useful features such as a real-time guard and program definitions that are updated daily, to provide the most up-to-date protection. The interface includes several tabs, including a system area where you can check the current status and configuration of the program and choose the scanning method you want to use. In this section, you can also set the time that the program will run, and the amount of information that will be downloaded from the Internet during the scan. The program has a "Spyware Scan", "Malware Scan", "Finder Scan" and "Older Version Scan" section. Each section contains a number of filters that can be applied to specify which components you want to scan. You can specify the zones in which Advanced System Protector

should perform the scan. The program supports two main scanning methods: "Standard" and "Custom". The former scans the total memory of your system, while the latter lets you choose specific areas for the scan, such as cookies, browser history, temporary files, and file system. You can add, manage and update filters through the "Filter" tab, with which you can exclude files and folders from the scan, and change Advanced System Protector's settings. Advanced System Protector can update the list of definitions that it has in its database, including spyware definitions, browser helper files, Web browser helper objects, internet proxy bypass files, adware and browser helper objects. The list is updated daily and has the most up-to-date information about the threats. Advanced System Protector's scanner and protection engine are constantly in operation, while the Anti-virus scanner stops processes when a threat is detected. Advanced System Protector also includes several features that allow you to monitor the activity of your PC more accurately. These include a memory monitor, a log, updates to threats and definitions, system processes, a Startup manager and a System restore manager, that can be adjusted on the fly. Advanced System Protector's Anti-spyware engine includes a

real-time guard that allows you to adjust the intervals and events of detection and removal. You can also set the program to scan any system state, or for Windows startup

What's New in the Advanced System Protector?

Advanced System Protector is a program designed to fight against system threats, adware, worms, trojans and other malicious software, which may affect your computer, laptop, mobile phone or PDA. If it is installed on your computer, it will help you to keep the computer safe from spyware threats.
