The biggest reason why Photoshop Elements is a better alternative to Photoshop is that it costs less. You can get Photoshop Elements from the Adobe Store for only \$49.99, while the Professional version costs \$269.99. In addition, you can create one-time licenses to Photoshop Elements for \$39.99. If you'd like to purchase more than one license or you'd like to renew a license that you currently have, you have the option of getting the two-year subscription option. That subscription is available for \$99.99 which makes it more economical than the traditional purchase options. Take a look at what else it has to offer: Create and edit images of almost any size and print them on standard 8.5 x 11-inch paper at a standard 300 dpi. You can print up to 20 high-quality prints in a row from an individual image, or an entire folder. You can print as many as 800 images in one go from one folder using the Print function. You can print images on a color or black-and-white printer. You can print professional-quality images to a laser printer, color inkjet printer or the built-in Canon printer. You can save your images in JPEG, JPEG 2000, or PDF format. You can generate a Web optimized JPEG of an image for fast delivery over the Internet. You can save a print-ready version in the PDF format so that you can share the image with colleagues in

"The picture is pretty much what we saw: it shows you what happened from start to finish," Kendall says. "It's just a picture that makes you gasp. It's a very special one, because it shows that it wasn't an on-camera picture. It is an important witness to the fact that we have a picture of Sandy as it was, and not a picture of somebody that happened to be the best-looking member of the picture." Kendall, who has a reputation as one of the finest forensic artists in the world, admits that he occasionally falls into the trap of making super-detailed reconstructions. But, he says, Sandy's murder of Bob is "too important." Perhaps, but as Kendall knows all too well, such pictures do not elicit the same response as the one he has just provided. He may have become the world's foremost expert on fake photographs, but he still understands the power of images. For Kendall, the most damning evidence that Sandy was indeed the girl in the picture are the bullets, points the FBI. Given what we know about the murder, he believes that Sandy was killed with a .38-caliber revolver. To him, that seems like the most logical weapon. "We know that there were three people in the room, and that Sandy was the only one who would have been in a position to fire the gun," Kendall says. "From the photographs, we know that the bullet went into Bob's forehead and out his head. That bullet came out of the gun Sandy fired. This does not come from any experience, it comes from logic, it comes from photos, it comes from the story, it comes from everything else." Kendall also believes that a body found in the woods near Bob's house belonged to Sandy. Kendall believes that the body belongs to a woman who was 19 to 30 years old, brown hair, and broad-shouldered. We will never know for certain whether Kendall's reconstructions are fact or fiction. But he says, "I know they are very real. I'm not sure how real all the video is, but I know that there are pictures of Sandy. I know I'm right in most of the way." Some people have gone to Kendall for help with reconstructing missing persons, and he has provided the FBI with several hundred reconstruction reports. The FBI considers Kendall the best in the business, and he claims that the agency has already requested a few of his
